

Roncesvalles Carhouse Maintenance Facility Extension for New Streetcars

THE PROJECT: The Toronto Transit Commission will construct an addition to the existing carhouse building at its Roncesvalles Yard, located at the northwest corner of The Queensway and Roncesvalles Avenue. This extension is necessary in order to maintain the next generation of streetcars that will join the TTC's fleet of service vehicles – Low Floor Light Rail Vehicles (LFLRV). The new addition to the yard will give the TTC the ability to maintain its vehicles to meet daily service and safety requirements. When completed, the carhouse will have a new maintenance bay with a service pit, overhead platforms and cranes necessary for daily maintenance. The new streetcars are twice as long as the

current vehicles operated by the TTC and are designed with roof-mounted equipment that must be accessed using platforms. Roncesvalles Yard currently serves as a daily maintenance facility and will continue to perform this role with the arrival of the new streetcars. Heavy maintenance operations will occur at the new Ashbridges Bay facility. Construction at Roncesvalles is to begin in the spring of 2012 and be completed in the summer of 2013.

Under the Freedom of Information and Privacy Act, unless otherwise stated in the submission, any personal information such as name, address, telephone number and property location included in a submission will become part of the public record for this matter and will be released if requested to any person.
